zetControl CIM by zetVisions Now an SAP- endorsed Business Solution

zetControl CIM provides more compliance, operational excellence and possibilities to increase overall value for corporate groups

Heidelberg, March 29, 2007 –zetVisions AG today announced that its zetControl Corporate Investment Management (zetControl CIM) solution is now an SAP-endorsed business solution. zetControl CIM was developed in close cooperation with SAP AG and complements the mySAP™ ERP Financials solution by adding investment management functions. Increasingly complex company structures and statutory requirements impose an increased need for software solutions that bring transparency to intricate webs of investments. zetControl CIM by zetVisions provides this capability.

“This agreement is a milestone for zetVisions. Our customers benefit from the optimum integration into the relevant SAP solutions, and investing in the most reliable and innovative solution for the management of corporate investments,” said Marko Albrecht, chairman of zetVisions AG.

The endorsement builds on zetVision’s successful business relationship with SAP in the financial industry. As part of the agreement, both zetVision and SAP will provide development resources, exchange and share technology and product roadmaps, as well as promote and sell the jointly developed solution. zetControl CIM adheres to similar software quality standards as SAP solutions, and has also achieved “Powered by SAP NetWeaver®” status.

"Our endorsement of zetControl CIM by zetVisions demonstrates our deep commitment to helping companies manage compliance and predict risks," said Kevin Ichhpurani, Global Vice President, Business Development and Strategic Alliances, SAP. "With zetControl CIM, SAP can offer a compelling solution in an important growth market. Our customers stand to benefit from enhanced automation of manual processes, TCO reduction, and faster closing times."

zetVisions acts as an independent software vendor. The agreement covers the EMEA region (Europe, Middle East, Africa); a world-wide expansion is planned. zetControl CIM can be found on the SAP solution map at www.sap.com, in the SAP ERP Financials application. Among the first customers to benefit from zetControl CIM endorsed by SAP are Franz Haniel & Cie. GmbH and Knauf Group.

About zetVisions

zetVisions AG has specialized in increasing efficiency in investment management and corporate management. Since its foundation in 2001, zetVisions has been engaged in investment management issues. Initially, the focus was on the demanding field of "Private Equity and Venture Capital." The solution was qualified as an SAP industry solution. zetControl, a general controlling solution for the fields of finance, sales, purchasing, and headcount grew from these experiences.

In July 2006, zetVisions presented the first release of zetControl CIM. The solution supports companies in directing their subsidiaries, addressing legal requirements, and enhancing value-oriented management of the corporate group. zetControl CIM is an SAP-endorsed business solution and therefore integrated in long-term SAP strategies in the area of SAP ERP Financials, both technically and business-driven.

zetVisions cooperates with well-known consultancy companies like Capgemini, Steria Mummert Consulting, Plaut and Steeb. The company now counts 40 employees and is financed through Venture Capital.
